PROJECTS

- Forge AI | AI-Powered React App Builder** Jun'26 – Jul'26
Tech: Next.js, React, TypeScript, Node.js, Supabase, Clerk, Prisma, Gemini API, Cline SDK, Sandpack, Arcjet
 - Built a full-stack AI-powered application builder that generates production-ready React applications from natural language prompts with live code preview, streaming AI responses, and persistent workspaces.
 - Integrated Gemini API for streaming code generation, image-assisted prompting, persistent chat history, and structured multi-file project generation using Supabase and Prisma.
 - Developed scalable backend APIs with Clerk authentication, role-based access control, subscription-based credit management, Arcjet rate limiting, and AI-powered code improvement using the Cline SDK.
- Secure Authentication & Session Management System** May'26
Tech: Node.js, Express.js, TypeScript, MongoDB, JWT, Zod
 - Engineered a modular, feature-based backend architecture with reusable middleware, centralized error handling, and type-safe request validation using Zod.
 - Implemented a production-ready JWT authentication system using short-lived access tokens, rotating refresh tokens, HTTP-only cookies, hashed token storage, and protected REST APIs.
 - Developed secure session management featuring refresh token rotation, replay attack detection, concurrent session limits, MongoDB TTL indexes, and single-device/multi-device logout.
